Minchan Kim

Portfolio | GitHub | gimm79103@gmail.com

High school senior interested in artificial intelligence, with projects in AI assistants, computer vision and physical control.

EDUCATION

Qingdao Daewon School | Class of 2027

Senior | GPA 3.984 / 4.0 (Unweighted) | Intended field: Artificial Intelligence

EXPERIENCE & CLUB LEADERSHIP

JSL Logistics | Intern

August 2026 to present

- Developing document-based AI support, photo-assisted damage review and logistics interfaces; staff review AI inspection suggestions.
- Building a cargo-loading planner that checks dimensions, rotation, stacking support and payload limits.

COSMOS (Aero-Engineering Club) | Founder & President

Sep 2025 - Present

- Founded and lead a 10-member engineering club. Led two rocket static-fire tests; corrected a recording failure and captured a continuous thrust record reaching about 190 N.
- Coordinate the ongoing TVC-Hopper project, combining reinforcement-learning simulation, avionics and CAD. Physical validation is still in progress.

DAEMUN III (Daewon Model UN) | Deputy Head of Technology

Started Aug 2026 | Completed

- Co-developed the completed conference platform with Junwon Kim: public site, Roger AI assistant, organizer dashboard and delegate submissions.
- Built conference-data context, streamed AI replies, provider fallback, role-based permissions and versioned document submissions; expanded the FAQ seed to 103 entries.

Mintech | Intern

August to September 2026 (one month)

- Assisted with dimensional checks using vernier calipers and micrometers, equipment checks and workplace organization; learned sputtering equipment and manufacturing-quality fundamentals.

SELECTED PROJECTS

Tern

In progress

- Developing an independent flight-search and booking app with the Duffel API, four language routes and React Three Fiber scenes.

Automated CIWS Drone Tracking Turret

Completed

- Built a school science-fair camera-tracking rig with Python, OpenCV and Arduino servos, including a color-tracking dual-turret demonstration and separate YOLOv5 detection experiments.

ADDITIONAL LEADERSHIP

Student Council, Planning Department Vice President (2025 to March 2026).

Mechanics Club, Vice President (March 2026 to present): built and tested a 4-bit ripple-carry adder using logic-gate ICs.

SELECTED HONORS

1st Place, Physics Division, School Research Paper Competition (G11, 2025 to 2026): F-22-inspired RC aircraft design and flight stability.

1st Place, School Science Fair (2025 to 2026); 2nd Place, School-wide Writing Contest (G10, 2024). All awarded by Qingdao Daewon School.

TECHNICAL SKILLS

Python, TypeScript, Next.js, React, PostgreSQL, APIs, OpenCV, Arduino, FreeCAD, OpenSCAD
